SUMMER IN ITALY

#### Summer in Italy.....

Collabrating with Gabbana.life to create a equisite collection of bespoke western and indian men's wear. Taking inspiration from the WGSN trend SLOW FUTURE and from the mood rustic minimalism the designs and the exploration made. A classic vintage double breasted suit made from a beautiful grey glen plaided fabric with an ankle length pant to add a modern look. The shirt with a mauve blend detail embellished with running stitch in grey to give proportion and balance. The whole collection is created keeping in mind the brand's style of creating a timeless and classic garment that men adorn to wear.

#### Summer in Italy.....

An exquisite fresqo suit patterned with Glen plaids in beautiful cool grey and a hint of mauve mist directing to the summer colour trends of 2017. The suit is styled with a Giza cotton shirt with running stitch details on the placket. Inspired from PITTI UOMO and the trend SLOW FUTURE, to create a double breasted suit that suits both the inspirations.

## DECTURE

The geometric , angluar and asymmetrical aesthetci of the deconstructive style of in architecture shown with monochrome, silvers and a hint of red to create bolddness. The more industrial look given to the extended parts of the dress and the deconstructed working made in the garment brings in the beauty of deconstruction. The beauty of randomness and asymmetry creates a more modern look to the design created.

## DIOR SS18

Taking inspiration from the iconic new look of Dior that includes the bar jacket and accentuated hip line dress mixed with the taste of Maria Grazia's spring collection to create a sutle collections with embrodieries inspired from the tarot cards and nature embedded with tiny star and moon like gold and silver embrodiery. Only taking the most subtle and gentle colours of monochrome and beige with the air like chiffon, cotton and tulle to create beautiful and delicate transparency and feminine touch to the whole collection. hand painted with Indian ink with beautiful and dull strokes of the rounded edge brush. And finally and intrucately done embrodieries with acrylic with a fine tip brush to create the beautiful embrodiers of the season.

### TECH PACK

#### Tech pack.....

Taking a shirt from the Indian Terrain AW'16 Madras Plaid collection and has created the weave of the shirt and replicated it to create the technical pack of the shirt and a different colour way. The details of the shirt are being in emphasized in every page of the tech pack.

IMPLEMENTING ECONSTRUCTION TO REDUCE THE EFFECTS OF OVERSTOCK GARMENTS FROM FASHION COMPANIES

The concept of deconstruction combined to create awarness about the harms of dumping of overstock garments in landfills. The project has taken forward the idea that it takes about 1000 years to decompose polyeste and polyester blended or based products and to revolutionize the real meaning of deconstruction to make ready- to- wear garments that will use up both these concepts together. The development of the garments were made keeping in mind the mood powerful as deconstruction is all about making a powerful move towards the world of glamourous fashion. The colour was selected with the garments collected from brands.

Step 1: The garments that were chosen to make this garment consists of five garments and 1/2m of overstock fabric.

Step 2: First the garments are deconstructed from seam to seam and the smaller parts like the pockets, waistband, collars and rokes were tossed away.

Step 3: For the top: precisely one shirt was used. The front and back parts of the shirt were traced with the pattern of the crop top. For the sleeves each of the legs of the pant were attached with each other along with the overstocked fabric and the sleeves were draped.

Step 4: For the top: after we have traced for both the sleeve and the top of the garments were sticthed asusal.

Step 5: For the bottom: the other three shirts and the front of the back part of the shirt were attched to each other to create a long piece of fabric. All the extra parts of the armholes and the curves were trimmed into a rectangular piece. The pattern of the cullottes were traced. Step 6: For the bottom: like any other way of stitching a pant, the pant was made.

Step 1: All the garments chosen are tops. All the garments were ripped off from seam to seam and the stripes were cut off.

- Step 2: For the 1st exploration, the first exploration is the lace applique. The stripes were cut in grey, white and blue.
- Step 3: The base fabric was pierced to create holes in the fabric to insert the stripes of fabrics.

Step 4: The fabrics that are made into stripes and are pushed into the holes that are put in the base.

Step 5: The fabrics are formed into loops and knotted in the bottom.

- Step 1: All the garments collected are ripped from seam to seam.
- Step 2: The garments are made into stripes.
- Step 3: For the exploration: the stripes are folded twice on itself and made a straight stitch.
- Step 4: The stripes were sticthed in a manner to create this lace applique.
- Step 5: For the 2nd exploration: the second exploration is a braided weave, we need the same stripes for this as well.
- Step 6: The stripes were braided and sticthed in the end so it does not unravel.
- Step 7: The base of the fabric is amrked for 1/2 inch from the strat to the end and holes are made in the base fabric.
- Step 8:The braided parts is weaved in the base fabric.

Step 1: The garments are the one blue pant, 1 top and 1/2 m of the overstocked fabric. All the garments were deconstructed from seam to seam. Step 2: The smaller pieces of the garment like the sleeves, yoke, waistband, straps and pockets were tossed away. The garments were trimmed to create a perfect rectangle and were attched together to form a long piece of fabric. Step 3: The patterns were traced on to the fabric and is sticthed as usual.

Decontruction of overstock garments .....

# EXOCTIC ANIMALS

Inspiring from the animal prints to create a fusioned collection with funky animal prints mixed together to create a contemporary collection of prints. The collection was made into a resort wear with these prints mixed together in each garment. The colours are inpired from the bright summer days and giving muted pastel shades for depth.

represents the branches of the tree and how it disappears through the branches.

Exotic	Animals	•

### Exotic Animals .....

# Exotic Animals .....

. . . . . . . . . .

# Exotic Animals .....

Inspiring from the sea side people of the 80's. Getting inspired from the beaches and their laidback lifestyle. The collection was ranged to a swimwear collection with prints developed from the beach views and beachy things like tote bags, swimming hoop and flip flops. The colours staying to the bright beachy colours with hints of chrome yellows to give the 80's vibe.

#### 90's Beach .....

# Metacubism

#### Metacubism.....

Metabolism is an Japanese architecture movement evolved after the 2nd world war. The achitectural movement was invented by Kenzo Tange and the whole idea of the architecture is to create a new world with suspending buildings and structures that can be deconstructed and reconstructed. For my concept, I have taken inspireation from the cubic structures of the Nagasin capsule tower, Japan and draped on thecubes on the body where in the stucture was inspired from the other buildings of the architecture. The collection was made into a wearable avant garde collection with work wear silhouettes with flares of masculinity.
